

# ENVIRONMENTAL POLICY

MAKING THE ENVIRONMENT COUNT

As a manufacturer of print media Phase Print recognise that its processes have an impact on the environment. We are committed to the prevention of pollution by taking all practical steps towards reducing our significant environmental impacts.

In developing our environmental management system (EMS) we have established environmental objectives, targets and controls to:

- Reduce paper and chemical waste
- Increase re-use and recycling of wastes wherever practicable
- Reduce emissions to air
- Minimise energy use
- Promote the use of FSC approved papers
- Share our environmental goals and values with our customers and key suppliers

Phase print will comply with applicable legal requirements and industry best practices relevant to its environmental aspects.

Through effective communication and training, we will ensure that our staff and those working on behalf of Phase Print are able to meet our policy commitments and achieve our environmental goals.

Achievement of our policy objectives will be reviewed regularly to ensure that we meet our commitment to continual improvement.
